ELECTRONICS AND COMMUNICATIONS IN JAPAN

Part 3: Communications

VOLUME 74

CONTENTS FOR 1991

NUMBER 1

Page

Hisao Shiizuka, Shuji Tsukiyama and Isao Shirakawa: Properties of Minimum ILFI Graphs with Hamiltonian Cycle 1

Akihiro Tsutsui and Masao Ikeda: A Decomposition Algorithm for Linear Algebraic Equations—Distributed Processing by Computer Network Systems . . 11

Yuichi Noro, Kenji Inomoto and Kazuhiro Kuno: Sinusoidal Frequency Estimation with Small-Sized DFT 22

Makoto Nakamura and Tomoko Kodama: An Efficient Hybrid ARQ Scheme for Broadcast Data Transmission Systems 31

Tomoko Kodama and Makoto Nakamura: Error Correction Schemes for Differentially Encoded Multilevel QAM Transmission Systems 40

Kazuhiko Shimizu, Kazuyuki Aihara and Makoto Kotani: An Electronic Circuit Model of Chaotic Neural Networks 51

Naoyuki Aikawa, Ye Jun and Masamitsu Sato: Design Method of Bandpass Prefilters with Arbitrary Frequency 65

Hitoshi Honma, Naoyuki Aikawa and Masahiko Sagawa: Design Method of Efficient Equalizers for Bandpass FIR Digital Filters with Fewer Multipliers 74

Hirofumi Kawashima: Influence of Frequency-Temperature Behavior of the Supporting Portions for GT Cut Quartz Crystal Resonators Formed by an Etching Method 82

Takao Hinamoto, Mahdad Nouri-Shirazi and Ryuji Yamaguchi: Minimization of Sensitivities with Frequency Weighting Functions for Multiinput Multioutput State-Space Digital Filters 92

Masayoshi Miyagi, Toshiaki Ogawa, Iwao Sasase and Shinsaku Mori: Suppression of CW Interference and Noise in QPRS-Systems Using Decision-Feedback Filters 102

Shigeru Yamada, Tetsuo Ichimori and Hiroshi Masuyama: Optimal Release Problems on Software Failure Time-Measuring Reliability Models 111

NUMBER 2

Kiyotaka Yamamura, Kenjirou Fukuyama, and Kazuo Horiuchi: Rectangular Algorithm for Computing the Capacity of Arbitrary Discrete Memoryless Channels 1

Hideaki Ito and Mitsuo Nakazawa: An Analysis of Impedance-Gas Pressure Characteristics of Tuning Fork-Type Quartz Vacuum Gauge — The Effects of the Drag Force and the Viscous Friction of Gas 10

Hideaki Ito and Mitsuo Nakazawa: An Analysis of Impedance-Gas Pressure Characteristics of Tuning Fork-Type Quartz Vacuum Gauge — The Effects of Stokes' Drag Force and Acoustic Radiation 19

Masafumi Hosokawa and Sigeru Omatu: Image Restoration and Signal Extraction Using Adaptive Digital Filters 28

Page

Matsuzo Takamura and Takashi Yahagi: A Method of Design for Adaptive Digal Filters Based on Parallel Kalman Filters 36
Masanori Higuchi, Yukio Ishibashi, Hisashi Kado, Naoko Kasai, and Kazuo Chinone: Localization of Pick-Up Coils in the Vector Magnetometer 47
Hiroshi Yamamoto, Makoto Tabei, and Mitsuhiro Ueda: Acoustic Ray Tracing in Discrete Wave Velocity by Deployed Triangle 59
Kiichi Urahama: Convergence Properties of Continuous Iterative Methods 70
Toshimasa Watanabe, Yasuhiko Higashi, and Akira Nakamura: Constructing Robust Networks by Means of Graph Augmentation Problems 79
Shigetaka Takagi, Nobuo Fujii, Takeshi Yanagisawa, and Kenji Tabei: Automatic Tuning Circuit for Continuous-Time Filters Using MRCs 97
Kazuo Takaragi and Ryoichi Sasaki: Improvement of Rabin-Type Public Key Cipher Algorithm for Electronic Authentication 107

NUMBER 3

Toshihisa Nishijima, Hiroaki Ishii, Hiroshige Inazumi, and Shigeichi Hirasawa: A Further Result on the Construction of Asymptotically Good Convolutional Codes for Low Rates 1
Etsuro Hayahara and Satoshi Hirano: Active R Filter Realization and Its Trimming Technique 8
Akira Kobayashi and Takashi Yahagi: Adaptive Arrays Using a Complex Learning Algorithm 15
Makio Tsuchiyama: Development of an Educational Computer Simulator 25
Keiichi Tokuda, Takao Kobayashi, Shoji Shiomoto, and Satoshi Imai: Adaptive Cepstral Analysis—Adaptive Filtering Based on Cepstral Representation 36
Tetsuo Tateishi and Kunihiro Asada: A Statistical Modeling of Charge Redistribution A-D Converters for Yield Optimum Design 46
Takashi Shimamoto, Akio Sakamoto, and Akiyoshi Satoh: A Hierarchical Approach to Module Placement Using Neural Networks 57
Eisuke Horita, Yoshikazu Miyanaga, and Koji Tochinai: Characteristic Extraction of Speech Using ARMA Model with Double Inputs 67
Hiroaki Sandoh and Hajime Kawai: An Optimal Backup Policy Considering Jobs for a Hard Disk 82
Toshinori Yoshikawa, Jun-Hai Wu, and Yoshinari Oguro: An Estimation Method of the Optimal Pairing and Ordering for State-Space Digital Filters 87
Shigeru Maeda: Certain Types of Runge-Kutta-Type Formulas and Reproduction of Orbits of Linear Systems 98
Kiyotoshi Matsuoka: Various Structures of Orthogonal Projection-Type Associative Networks 105

NUMBER 4

Taizo Umezaki and Fumitada Itakura: Evaluation of the Smoothed Group Delay Spectrum Distance Measure for Speaker-Dependent Speech Recognition 1
Sumio Masuda, Toshinobu Kashiwabara and Toshio Fujisawa: Decomposition of Three-Terminal Nets in Two-Layer Routing of PC Boards 10
Nobuo Fujii: Problems in Computer-Aided Simulation and Design of Analog Integrated Circuits—Stability of Analog Integrated Circuits 22
Hikaru Mizutani and Mamoru Tanaka: Sequential Analysis for Transistor Networks Including Distributed-Constant Circuits 31
Makiko Okumura, Hiroshi Tanimoto and Tsutomu Sugawara: Noise Analysis Method for Nonlinear Circuits with Two Frequency Excitations Using the Computer 41
Masaru Kamada, Kazuo Toraichi and Yasuhiko Ikebe: A Note on Error Estimation for Spline Interpolation Method with Sampling Bases 51
Kiyoshi Nakamura, Ryoichi Yasuike and Hiroshi Shimizu: Trapped-Energy Piezoelectric Resonators with Elliptical Ring Electrodes 61
Kazuo Toraichi and Masaru Kamada: A Note on Connection between Spline Signal Spaces and Band-Limited Signal Spaces 70
Yasutami Chigusa and Mamoru Tanaka: A Cyclic ΣΔADC Using Time-Sharing Technique . 79
Hikaru Mizutani: Analysis of Switched Networks Based on Virtual State Equation for Avoiding Singularity Problem 87

Page

Shoichi Takeda, Yoshiaki Asakawa and Akira Ichikawa: A Comparison of Synthetic Speech Quality Generated by the Residual- and Multipulse-Excited Analysis-Synthesis Methods 97
Tatsuo Sugimura and Yasunori Suetugu: Considerations on Irreducible Cyclotomic Polynomials 106

NUMBER 5

Tatsuya Fujii, Hiroshi Harashima, and Kaoru Arakawa: Extended-Order Statistic Filter and Evaluation of Noise Reduction Performance 1
Chiaki Todaka an Noriyoshi Kambayashi: A Realization of Interpolator with the Coefficients of the Power of Two 12
Hisao Okada: Sound Field Analysis of Ultrasonic Probe with Many Medium Boundaries 21
Tatsuya Morita: Separation of Mixed Voices by Acoustic Parameter Optimization . . . 30
Masaki Kobayashi and Yosio Itoh: Stationary Performance of Series-Parallel-Type Adaptive Digital Filter Based on a Logarithmic Estimation 39
Hiroshi Date and Terumine Hayashi: LSI Module Placement Methods Using Neural Computation Networks 49
Tetsuo Kirimoto, Yoshimasa Oh-Hashi and Takashi Hotta: Orthogonal Periodic Sequences with Two Complex Numbers Derived from M-Sequences 57
Shin-ichi Tachikawa and Gen Marubayashi: Spectral Efficiency of M-Ary/Spread Spectrum Multiple Access Communication Systems 65
Shigeo Wada and Shin-ichi Takahashi: A Construction of M-Channel Filter Banks with Hilbert Transformers 78
Hisamichi Toyoshima and Shin-ichi Takahashi: Construction of 2-D Digital Filters Using All-Pass Networks with Complex Coefficients 88
Kiyoshi Takahashi: Performance Improvement of LMS Algorithm 98
Shin'ichi Katsuno and Issei Yamasaki: A Study on Coding of Fractal Curves 105

NUMBER 6

Hiroshi Tsubokawa, Hajime Kubota, and Shigeo Tsujii: Floating-Point Error Analysis for Recursive Least-Square Algorithm Using UD Factorization 1
Hiromichi Watanabe and Hisakazu Kikuchi: A Synthesis of Active RC Multipassband Filters 11
Hitoshi Sekimoto, Yasuaki Watanabe, Mitsuo Nakazawa, and Keisuke Tanaka: Two-Dimensional Analysis of Coupled Thickness-Shear and Flexural Vibrations in Rectangular AT-Cut Quartz Resonators Using a Finite-Element Method 19
Toshihiko Takahashi and Yoji Kajitani: Number of Segments of Rectilinear Drawings of a Graph Whose Vertices are Fixed on a Plane 29
Masaaki Amano: Real Time Signal Detection in Communication System with Additive Non-Gaussian Noise 38
Hisakazu Kikuchi, Makoto Nakashizuka, and Hiromichi Watanabe: Design of a Pipelined Plane-Rotation Algorithm Based on the Error Analysis 53
Kazuo Toraichi, Ryuichi Kawamoto, Masaru Kamada, and Rokuya Ishii: A Design Method of Window Functions by Spline Approximation 66
Iwata Sakagami: Realization of Resistively Matched Three-Ports and the Suppression of Multiple Reflections Traveling on Branched Transmission Lines 75
Kazuo Kobayashi, Haruo Wakabayashi, and Yoshiaki Wakimura: Schematic Description Language for a Hardware Top-Down Design Approach 85
Michitaka Kameyama, Masahiro Nomura, and Tatsuo Higuchi: Design of Multiple-Valued Module Array Using Signed-Digit Arithmetic 96
Atsushi Nakagaki, Yoshikazu Miyanaga, and Koji Tochinai: A Time-Varying Parameter Estimation of a Minimum Realization ARMA Lattice Model 106

NUMBER 7

Page

Mitsuhiro Azuma, Takayuki Hasebe Naoya Torii and Ryota Akiyama: A Study of Speech Scramblers Using the Transmultiplexer Technique 1
Chang Seok Choi, Tsuyosi Takebe and Hiroshi Harashima: Three-Dimensional (3-D) Facial Model-Based Description and Synthesis of Facial Expressions 12
Masanao Ebata, Kanako Maeda, Kenji Takada and Tsuyoshi Usagawa: On Detection of Quantization Noise in Low Level Reproduction of Digital Audio System . . 25
Tauyoshi Takebe and Tadashi Yoshida: A Method of Designing Parallel-Type Pseudo-Minimum-Phase FIR QMF Banks 34
Atsushi Kawakami: Pole Assignment for Three-Dimensional Systems Using Two-Dimensional Dynamic Compensators 45
Akii Katoh and Hajime Kubota: A Variable Step Gain Algorithm with Fuzzy Control 58
Michiroh Ohmura, Shin'ichi Wakabayashi, Jun'ichi Miyao and Noriyoshi Yoshida: Improvement of One-Dimensional Module Placement in VLSI Layout Design . . . 67
Hisashi Ito, Shun-ichi Amari, and Kingo Kobayashi: Identifiability of Hidden Markov Processes and Their Minimum Degrees of Freedom 77
Kingo Kabayashi, Shun-ichi Amari and Hisashi Ito: Equivalence of Hidden Markov Models 85
Masaji Yamashita, Kozo Hatori, Koichi Shimizu, and Goro Matsumoto: Evaluation of Human Exposure to Ion-Current Using Boundary Element Method 95
Sadaoki Furui: Speech Recognition Using VQ-Codebooks Representing Hierarchical Spectra Dynamics 105

NUMBER 8

Mitsunori Makino and Shin'ichi Oishi: Constructive Analysis for Infinite-Dimensional Nonlinear Systems—Infinite-Dimensional Version of Homotopy Method 1
Zhiquiang Ma, Kenji Nakayama, and Gaishi Yamamoto: A Method to Minimize Output Noise in Cascade SC Filters 11
Ken-ichi Iso and Takao Watanabe: Speaker-Independent Speech Recognition Using a Neural Prediction Model 22
Yasuo Okabe, Naofumi Takagi, and Shuzo Yajima: Log-Depth Circuits for Elementary Functions Using Residue Number System 31
Zhuang-Zhi Yen, Shigeru Eiho, and Hiroshi Tanaka: SPRODICE: A Diagnosis Support Program for the Interpretation of Brain CT Images 39
Xiangyi Wang, Yoshikuni Onozato, Hisato Hokanishi, and Shoichi Noguchi: Stability Analysis of Random Access Scheme by Lyapunov Function 51
Takahiro Kawashima, Takeshi Higashiyama, and Hideki Asai: Relaxation-Based Spectrum Analysis for Nonlinear Circuits 61
Takao Hinamoto and Mitsuji Muneyasu: Realization of 2-D Separable-Denominator Digital Filters for Real-Time and Parallel Processing 71
Yukio Ishibashi: Synthesis of an LC Filter Suitable for LC Simulation-Type RC Active Filters and Its Application 80
Akio Ando and Kazuhiko Ozeki: A Clustering Algorithm to Minimize Recognition Error Functions 89
Hiroyasu Sakamoto: Maximum Entropy Sampling Frequency for Stationary Gaussian Signals 99
Akira Takahashi, Nobuo Nagai, and Nobuhiro Miki: A Complex Digital Filter with Asymmetrical Frequency Response Based on Imaginary Resistance 108

NUMBER 9

Yoshio Itoh, Toshiyuki Morikawa, Masaki Kobayashi, and Hiroji Kusaka: An Orthogonal Function-Type Adaptive Digital Filter Applying a Modified Discrete Fourier Transform 1
Miki Haseyama, Nobuo Nagai, and Nobuhiro Miki: Designing Method for ARMA Four-Line Lattice Filter with Sliding Rectangular Window 11

Page

Hisato Fujisaka and Chikara Sato: An Algebraic Analysis for Bifurcation Problems . . 22
Yasuaki Inoue: A Statistical Analysis Algorithm Based on the Continuation Method . . 33
Haruo Ogiwara and Kazuyuki Kaneda: Multilevel Coding for Impulsive Noise 44
Hiroyuki Kudo and Tsuneo Saito: Tomographic Image Reconstruction from Incomplete Cone Beam Projections by the Method of Convex Projections 54
Seiji Hirose and Hiroshi Shimizu: Design Theory of Piezoelectric Ceramic Transformer as an Asymmetric Filter 64
Kenichi Aoki, Tomoo Kamakura, and Yoshiro Kumamoto: Parametric Loudspeaker—Characteristics of Acoustic Field and Suitable Modulation of Carrier Ultrasound 76
Yoshio Itoh, Masaki Kobayashi, Eturo Hayahara, and Toshiyuki Morikawa: A Study on Convergence Speed of an Orthogonal Function-Type Adaptive Digital Filter 83
Hideo Murakami, Gosuke Yamano, and Yoichi Koyama: Nonrecursive Multiple Filters on an Integer Residue Ring 92
Akira Nakamura and Nozomu Hamada: Identification of Nonlinear Dynamical System by Piecewise-Linear System 102

NUMBER 10

Masahiro Hayashi: Network Reliability Analysis Using Dual Graph 1
Hiroshi Fukuoka: Maximum Likelihood Estimation with a Weibull-Superimposed-Type Model and Its Application to Failure Pattern Analysis of a Ground Device of Shinkansen ATC 13
Taizo Iijima: Theoretical Study on Reconstruction of Waveforms by a Natural Observation Filter 22
Kiyotaka Yamamura, Kaori Arai and Masahiro Kiyoi: A Piecewise-Linear Homotopy Method for Nonlinear Programming 28
Taizo Umezaki, Harald Singer and Fumitada Itakura: Evaluation of Smoothed Group Delay Spectrum Distance Measure in Speaker-Independent Speech Recognition . . 39
Takao Hinamoto, Hideki Toda and Ryuji Yamaguchi: Design of 2-D Separable-Denominator Digital Filters Using Impulse Response Grammians 49
Takuji Toyoshima, Nobuhiro Miki and Nobuo Nagai: Adapative Formant Estimation with Compensation for Gross Spectral Shape 58
Shogo Nakamura, Akiyoshi Kawahashi, Yoshihiko Horio, Makoto Kotani, and Yukio Kadowaki: A Novel Design of an FIR Filter with a Hierachical Structure and Its LSI Implementation 69
Toshimitsu Ushio: Nondeterminism and Existence of Finite-State Supervisors in Discrete-Event Systems 78
Michiroh Ohmura, Shin'ichi Wakabayashi, Jun'ichi Miyao, and Noriyoshi Yoshida: Hierarchical Detailed Floorplanning with Global Routing in VLSI Layout Design . 85
Hirofumi Yanai and Yasuji Sawada: Some Properties of Sequential-Association Type Neural Networks 96
Michio Miyakawa and Itsuo Yamaura: Visualization of the Three-Dimensional Structure of Absorbed Power of Electromagnetic Waves—A Synthetic Paste Phantom Containing a Nonionic Surface Active Agent and Measurement of Its Physical Properties 104

NUMBER 11

Takuro Kida and Leopoldo Rideki Yoshioka: Design of Subband Transmission Systems in Time and Frequency Domain 1
Takuro Kida and Hiroshi Mochizuki: Study of the Superiority of Generalized Linear Interpolation Approximation 15
Masahiko Ohmura, Hiroto Yasuura and Keikichi Tamaru: Function Information Extraction from Combinational Circuits 28
Yutaka Yokoyama, Yoshikazu Miyanaga and Koji Tochinai: Automatic Design of a Parallel/Pipelined VLSI Architecture for Signal Processing 39
Shin Kagami, Akihiro Moriyoshi and Ichiro Fukai: Road Noise Barriers as Sound Radiation Systems 49
Yoshio Hamamatsu, Tadaaki Yoneyama and Shinya Kikuchi: Analysis of Vehicle Behavior at a Merging Section of APM System with Different Strategies 58

Page

Toshikazu Sekine, Takashi Nakamura and Senji Yokokawa: A Design of Wide-Bandpass Filter Using Transmission Lines and Lumped Capacitances 68
Yoshifumi Nishio, Shinsaku Mori and Naohiko Inaba: Chaos in a Four-Dimensional Autonomous Circuit with Two Diodes 77
Mitsunoai Makino, Shin'ichi Oishi, Masahide Kashiwagi and Kazuo Horiuchi: Computational Complexity of the Homotopy Method for Calculating Solutions of Strongly Monotonic REsistive Circuit Equations 90
Resve A. Saleh, Takahide Inoue and Sachihiko Ido: Enhanced Circuit Simulation Expectations, Problems, Implementation, and Integration 101
Bunpei Irie and Mitsuo Kawato: Acquistion of Internal Representation by Multilayered Perceptrons 112

NUMBER 12

Zhi-jian Dai and Kunihiro Asada: An Area-Minimum Synthesis Method Based on Topology Decomposition of Multistage Complex MOS Gates 1
Satoshi Wakabayashi, Hiroyuki Ishikawa, and Ryo Dang: A Fuzzy Selection Method for Generated Equivalent Logic Circuits 11
Kenji Ohue and Tsunehiro Aibara: An Algorithm for Generating Low Autocorrelation-Sidelobe Skew Symmetric Binary Sequences Based on Complex Exponential Functions .. 24
Tetsuji Matsuo and Akira Kishima: A Method for Numerical Analysis of Bifurcation of Periodic Solutions in Nonautonomous Systems with Hysteretic Elements 33
Kensaku Fujii, Yoshihiro Sakai, and Juro Ohga: Influence of Time Constant on Coefficients Estimation Error Derived from a Lowpass Filter Expression for Learning Identification Algorithm 43
Katsuya Kondo, Yasuyuki Sugi, Pei Ding Xue, and Nozomu Hamada: A Design Method of 3-D FIR Digital Filters Detecting Linear Trajectory Signals Using the Rotation and Interpolation in the Signal Domain 55
Mitsuji Muneyasu and Takao Hinamoto: Analytical Least-Square Design of Three-Dimensional Linear-Phase FIR Digital Filters 67
Hirofumi Kawashima and Masaru Matsuyama: G-Type Quartz Crystal Resonator with Supporting Portions in Length or Width Direction of Vibrational Portion 77
Zhiqiang Ma, Kenji Nakayama, and Gaishi Yamamoto: A Method to Minimize Sensitivity in Cascade SC Filters 86
Kiyoaki Aikawa and Sadaoki Furui: A Distance Measure for Speech Recognition Based on an FM-Neuron Model 97
Masato Sasaki, Mitsuo Gen, and Kenichi Ida: A Method for Solving Reliability Optimization Problem by Fuzzy Multiobjective 0-1 Linear Programming 106
